

Virtual Event: Information & Data Management

Creating clear and strategic governance policies to drive data accuracy and accessibility

Online: Thursday, October 21, 2021 Time: 12:00-2:15pm ET & 9:00-11:15am PT

REASONS TO ATTEND

Uncover best practices for creating the systems to ensure your data is accurate, available and accessible to users

Understand how better to break down data silos with strong data governance policies and improved data quality

Get practical advice on how to work through the technological and cultural obstacles to realizing the full potential of your data

FRED ZANDBERG
Principal Solutions Architect
ESI Technologies, Denodo

AGENDA OVERVIEW

There are a multitude of benefits to robust information & data management: fewer information silos, better accuracy, security, accessibility, and a strong foundational information infrastructure to anchor future analytics and AI developments.

While the focus is always on the exciting capabilities of advanced analytics, ML, and AI, data management and governance is the crucial element to ensuring these more advanced applications are successful. Without strong data integrity and frameworks, the foundation to build your data strategy and maximize its value through more informed decision-making will be full of cracks.

Creating effective information and data governance strategies, policies, and frameworks drive the quality, accuracy and availability of insights. Security and privacy play a key part in ensuring you have the necessary public trust to leverage these insights and drive improvements for citizens. Public Sector Network's Information & Data Management Virtual Event will bring data leaders to the table to generate a diverse range of ideas that focus on a common mission: a public sector that maximizes the value of data.

WHO ATTENDS

Chiefs/Directors/Heads of:

- Data & Analytics
- Data Privacy/Security
- Data Governance
- Information Management
- Data Quality
- Data Management

FEATURED SPEAKERS

SYLVAIN BÉLANGER
Senior Director General, Digital Services, CIO, CDO, Office of the Librarian and Archivist of Canada
Library and Archives Canada

JOHN ROBERTS
Chief Privacy Officer, Archivist of Ontario and Chief Information Security Officer
Ontario Public Service

ELISE LEGENDRE
Chief Data Officer
Agriculture and Agri-Food Canada

MANDEEP FLORA
Director, Data Strategy and Solutions Platform, Business Intelligence and Practice Division
Ministry of Children, Community and Social Services, Ontario

JEFF BALL
Director of Open Government and Data Governance
Royal Canadian Mounted Police

RANDY REYNOSO
Director General, Data & Business Intelligence Directorate
Canada Revenue Agency

PATRICK NAOUM
Chief, Strategic Consulting & Emerging Practices / Executive VP
ESI Technologies, Hitachi
