

Virtual Business Intelligence & Data Warehousing

Improving Organisational Intelligence & Insight with Optimised Data Warehousing and Architecture Processes

Online → Wednesday, 05 May 2021 | 09:00am AEST

[CLICK HERE TO REGISTER](#)

Agenda Overview

Business Intelligence coupled with modern data architecture and warehousing can help structure data into meaningful and valuable information by unearthing insights and analysing trends hidden within the large stacks of data that governments have gathered throughout the years.

Most of today's data warehouses, especially in the public sector environment however, cannot support the ingest of data in real-time, and are plagued by inconsistent and duplicate data.

To help your department glean the best insights from big data we've put together the Public Sector Network's Data Warehousing & Intelligence virtual event, which has been carefully curated to help you understand, transform and optimise data warehousing capabilities for improved insight, functionality and cost reduction.

Speakers

Sean Preusse
Program Director - Data Warehouse,
Macquarie University

Steve Armstrong
Director, Strategic Planning & Capability Enablement,
WorkSafe Victoria

Kate Carruthers
Chief Data & Insights Officer
University of NSW

Robbie McGregor
Director, Data Application,
University of Waikato

Reasons to Attend

Must attend event for public sector data professionals looking to extract actionable insight from big data stacks.

Master how to leverage your data warehouse to analyse trends and unearth insights for informed decision making.

Explore the emerging solutions, tools and techniques that overcome challenges and drive efficiencies.

Who Attends?

Chiefs/Directors/Heads/Managers of:

Data & Analytics | Data Science | Information Management | Data Architecture | Business Intelligence | Data Warehousing | Enterprise Data Warehouse | EDW | Data Centres

Virtual Business Intelligence & Data Warehousing

Improving Organisational Intelligence & Insight with Optimised Data Warehousing and Architecture Processes
