

Virtual Information Management for Government

Strategically Managing Information Assets to Improve Usability

Online → Wednesday, 1 December 2021 | 11:00am AEDT

[CLICK HERE TO REGISTER](#)

Agenda Overview

By bringing together a range of resources including data, information, technology, information systems, business processes and, most importantly, people, Information Management (IM) transforms from a mere compliance activity into a tool that helps governments around Australia solve real business problems and realise the potential of information holdings.

Effective IM however is not easy. There are many systems to integrate, a huge range of business needs to meet, and complex organisational, security and cultural issues to address.

To help your department build and integrate smarter IM frameworks to extract business value from IM practices, enhance decision making and improve service delivery we've put together the Information Management for Gov virtual event.

Who Attends?

Chiefs/Directors/Heads/Managers of:

Data & Analytics | Data Ethics | Data Privacy | Information Management | Security | Data Acquisition | Governance

Speakers

Gavin Whyte
CEO,
Public Sector Consulting

Sylvain Bélanger
